MANUAL ARM BARRIER
TRAFFIC CONTROL

Heald's range of manual security barriers are designed for use in areas such as car parks where traffic control is required. They open easily with either a raising or horizontal swinging motion depending on site requirements, as well as a counterbalance to ensure easy operation. Barriers are lockable in both the open and closed positions.

Heald's raising and swinging manual arm barriers are all manufactured from heavy duty steel and aluminium. Aluminium models are available in lengths of 3 - 8 m for the raising barrier and 3 - 9 m for the swing barrier. A heavy duty steel version is available on both models between 3 - 6 m. All models are supplied with a quality padlock and are available with bottom skirts for added security.

Heald recommend that all manual arm barriers are installed into a concrete base. Technical guidance is available for customers wishing to undertake their own installation.

	Manual Swing Barrier	Manual Raise Barrier
Pivot Post	120 mm x 120 mm box section	150 mm x 100 mm x 5 mm box section
Pivot Post Base Size	400 mm x 400 mm square	600 mm x 500 mm x 10 mm deep
Beam	Aluminium box section 100 mm x 50 mm box section (3 m - 9 m length)	Aluminium box section 100 mm x 50mm x 3 mm box section (3 m - 8 m length)
